Mini News

News For The Employees of Data General

August 14, 1987

New Computers Extend Performance

The new ECLIPSE MV/7800 XP computer processes information faster than its predecessor, the ECLIPSE MV/7800 system.

Data General has enhanced its ECLIPSE MV/7800 series of mid-range computers with the introduction of the ECLIPSE MV/7800 XP and ECLIPSE MV/7800 DCX computers.

The ECLIPSE MV/7800 computer is a rack-mount system which offers up to 40 percent better compute performance, and provides up to 40 percent more I/O bandwidth than the original ECLIPSE MV/7800 system.

An office-packaged system, the ECLIPSE MV/7800 DCX brings the same high performance and office automation support to departmental and small business environments in a quiet, under-the-desk unit. Both systems include a full one-year, on-site warranty for both the hardware and expansion memory.

The ECLIPSE MV/7800 XP is an enhanced single-board implementation of the MV/Family architecture first introduced on the ECLIPSE MV/7800 last summer. Enhancements include an advanced microMV chip set, faster memory, and a faster processor cycle time.

Improved performance and an easy growth path for customers migrating from a 16-bit environment are available through a wide selection of printed circuit board-level and system-level upgrades. A printed circuit board-level upgrade program is also available for present ECLIPSE MV/7800 customers who want to take advantage of the improved performance of the ECLIPSE MV/7800 XP computer.

Pricing for the ECLIPSE MV/7800 XP begins at $23,000. Pricing for the ECLIPSE MV/7800 DCX computer begins at $33,300.

Customers Agree With New Systems

The ECLIPSE MV/7800 XP already has been installed by three value-added resellers (VAR): World Computer Corporation, EBS and HBO & Company. World Computer Corporation markets complete hardware and software packages to financial institutions. EBS serves independent insurance agencies. HBO & Company is a provider of information services to the health-care industry.

Dave Selina, senior vice president of marketing for World Computer Corporation, was enthusiastic about the new Data General product offering. "World Computer Corporation has evaluated the ECLIPSE MV/7800 XP under test conditions and enthusiastically endorses both the price/performance of the new system, and the fact that installed ECLIPSE MV/7800 systems now have a smooth upgrade within the ECLIPSE MV/7800 series. The ECLIPSE MV/7800 XP continues to demonstrate to VARs, such as World Computer, the commitment of Data General to the growth and extension of reseller foundation systems. We plan to order the ECLIPSE MV/7800 XP immediately."

Commenting on EBS' success with the ECLIPSE MV/7800 XP computer, Bob Dumont, vice president of sales/marketing and Joe Barriero, vice president of systems and product development, state, "EBS has completed preliminary testing of the ECLIPSE MV/7800 XP, and we have found this new system offers significantly enhanced performance as compared to the ECLIPSE MV/7800. The ECLIPSE MV/7800 XP rounds out the mid-range of the ECLIPSE MV computer line, and offers EBS a very powerful, cost-effective platform for our solutions for mid-size insurance agencies."

Darrell Young, president of the Products Division for HBO & Company, says, "We have tested the ECLIPSE MV/7800 XP with CLINSTAR Series products and found its performance exceeded ECLIPSE MV/7800 performance by as much as 50 percent. We view the ECLIPSE MV/7800 XP as an important element in our strategy to offer very cost-effective solutions to medical institutions

for those applications where the easy expandability of the ECLIPSE MV/15000 is not a requirement. We expect the ECLIPSE MV/7800 XP to enter significantly into our business plans with Data General for the coming year."

"The Picture Of Health" And Data General

"The Picture of Health" was the theme of the Data General exhibit at the American Hospital Association annual convention, which was held recently in Georgia. Data General illustrated its leadership in hospital computing technology by demonstrating for the first time its specialized hospital bedside terminal created exclusively for the health-care industry. Data General also introduced a new presentation called "CEO In Healthcare," which features the way CEO comprehensive electronic office software is used in hospitals.

According to Alan Law, director of Data General's Industry Marketing group, several of the leading health-care system suppliers were on hand to show that Data General is the business partner of choice by jointly exhibiting in the company's booth. These vendors included EDS/Health Services Division; Health Data Sciences; Micah Systems; Travenol Healthcare Information Systems; 3M Health Information Systems; and Elcomp Systems.

To highlight the exhibit, Health Data Sciences (HDS) demonstrated the hospital bedside terminal developed by Data General for use with the HDS ULTICARE software. ULTICARE is an innovative bedside-based hospital information system which improves the quality of patient care and shortens hospital stays. The system saves a nurse one to two hours of clerical work each shift.

The hospital bedside terminal has a 14-inch amber screen which displays characters in larger-than-normal size. An integral modem, which can handle both voice and data over twisted pair wiring is crucial, since few hospitals can rewire their buildings. An embedded badge reader, a Micom voice board and additional function keys also are integral to the terminal.

In multi-hospital corporations, CEO software allows for electronic exchange of information among hospitals throughout the country and around the world. Individual hospitals use CEO software as an efficient means to route messages and documents to anyone in the organization within seconds, greatly expanding the scope of internal communication.

In combination with powerful ECLIPSE MV/Family computer systems, these terminals will help hospitals deliver better care and keep better records, while lowering costs at the same time.

"As hospitals seek new ways to optimize their operations, they will discover that CEO is an important productivity improvement," says Alan. "It also can help hospitals market their services, an attractive benefit in today's competitive health-care environment.

"The hospital of tomorrow will provide more computerized patient care," Alan adds. "With fewer nurses and increasing attrition rate, hospitals are looking for both competitive and cost-effective solutions for quality patient care. Data General and its third-party vendor are providing those solutions and demonstrating their commitment to the future of the health-care industry."

Tempest, Rugged Systems Make The Headlines

Data General made a strong impression in June at the annual Armed Forces Communications and Electronics (AFCEA) trade show in Washington, D.C. With the announcement of the new ECLIPSE MV/15000T (Tempest) and ECLIPSE MV/15000R (Rugged) series, the company firmly established its position in the military marketplace. Now, the headlines are still telling the story in several military and government publications across the country. Below is a reproduction of the front cover of Defense News *magazine, a weekly publication. The cover is a copy of the poster which was part of Data General's exhibit at the AFCEA show. According to Tom Roberts, product manager within the Federal Products group, the Tempest and Rugged systems have become industry standards. "Defense is an important vertical market within the Federal sector, and "rugged" command and control is key within that marketplace. These products have put us squarely in position of leadership in the rugged marketplace," Tom says.*

Corporate Traffic Implements New Payment System

The Corporate Traffic department, working closely with employees from the Information Management Group's Manufacturing Field Service Development Division, has developed and implemented a new freight payment system which allows Data General to ship

material more cost-effectively, and provide immediate access to shipping information.

Prior to the installation of the new system, Transportation Freight Control (TFC), Data General used outside ""rvices to handle freight payment. With TFC, however, ...e company now has the necessary tools to conduct the payment process in-house.

"We discovered a definite need for an upgraded method of monitoring costs," says Bob Proulx, Corporate Transportation manager. "Before we made the transition, we had outside companies pre-audit and pay our bills. We then had them post-audited as part of a verification process.

"It was then and only then that we had a true picture of freight activity and associated costs. This process took as long as six to eight weeks which severely restricted our response time to act on identified problems. We felt we had to make freight payment more visible at the company."

TFC And EDI

According to Brenda Pascale, Corporate Traffic section manager, TFC is a freight-payment/audit processor. The system, which has been operating since last fall, relies heavily on electronic data interchange (EDI) between Data General and its carriers. This is necessary, Brenda says, because Data General's Westboro headquarters is responsible for all the company's freight-payment activity, processing an average of more than 20,000 freight bills a month.

"We've established the standard for EDI in the transportation industry," Bob says. "We can set the pace, as well. About 80 percent of Data General's carriers now submit freight bills electronically. Now, rather than taking a month to complete the bill paying process, we can take complete the process in a matter of days."

How The Program Works

The first step of TFC requires the Corporate Traffic department to electronically enter bills received into the system. The software then validates the bill to ensure that it is Data General's freight bill and that the correct charges were assessed.

The next day, any exceptions are noted and processed. At this point, all information is transmitted to the Accounts Payable department, which prepares a check. The system is automatically updated each step of the way. At the end of the month, a complete ledger report is generated, which separates payments and accruals. All in all, payments to freight carriers are made quickly and accurately.

Other Advantages

This program will also integrate the freight-payment 'nd private-fleet software programs, and provide for .ne electronic transmission of payment information between Data General, its carriers and their banks.

"As a shipper or receiver, I would much rather control my own information than rely on outside sources," Bob says. "We know our business better than any audit house. If any issues come up, we would know how to better handle them than an outside company."

Bleczinski Named Director Of Corporate Purchasing

Ed Bleczinski has been named director of Corporate Purchasing. He reports to Lee Henning, vice president of Central Manufacturing Services. Ed replaces John Kavazanjian who was named vice president for International Manufacturing Operations last May.

Ed has been with Data General for more than 10 years. Most recently, he was Low-Volume Operations manager in Southboro-Manufacturing. Prior to that, Ed worked in Corporate Purchasing for eight years as manager of the Sub-Contracts Purchasing and Commodities Purchasing areas.

Ed holds a bachelor's degree in business administration from Suffolk University.

Reporting to Ed are: Lou Basoli, manager of Direct Material Purchasing; Steve Maiorano, Purchasing Systems Development manager; Paul Milott, manager of Procurement Quality and Engineering; and Dean Sasek, manager of Indirect Materials and Services Purchasing.

Machon Named Portsmouth Plant Manager

Wayne Machon has been appointed plant manager for Data General's Manufacturing operations in Portsmouth.

Wayne has been Operations manager at Apex since 1985. Prior to that, he was Operations manager at Austin, and Test Engineering manager at Clayton. Wayne joined Data General in 1978 as a test engineer in Clayton after serving in design and manufacturing engineering assignments at Harris Corp.

Wayne holds a bachelor's degree in business administration from Rollins College. He also has earned associate's degrees in electrical engineering and electronics technology.

As a result of the recently-announced corporate restructuring, Portsmouth responsibilities will include systems integration as well as PCB asssembly and test for large ECLIPSE MV/Family systems.

Wayne reports to Vahram Erdekian, vice president for North American Manufacturing Operations. His assignment completes a realignment of responsibilities within North American Manufacturing Operations. Also reporting to Vahram are *Bill Kelleher,* director of North American Manufacturing Operations, supporting all North American Manufacturing plants; *Rod Gilvey,* Westbrook Plant manager; *Ralph Hudson,* Apex Plant manager; *Chuck Johnson,* Clayton Plant manager, *Bruce Neff,* Southboro Plant manager; and *Ramon Real,* Chihuahua Plant manager.

People

In SDD

Rona Pecarsky has joined Data General as a software engineer within the Proprietary Operating Systems department. She is responsible for supporting AOS/VS software. She reports to Paul Marino, senior section manager. Rona is a recent graduate of Syracuse University, where she earned a bachelor's degree in computer science.

Dan Wade has joined the Large Systems group as a hardware engineer, reporting to Mark Crooker, project leader. He is responsible for the design and development of diagnostic systems for high-end computer systems. Dan is a recent graduate of Tufts University, where he earned a bachelor's degree in electrical engineering.

Barbara Sangster has joined the Applications Software group as manager of Decision Support Software, reporting to John Metzger, manager of Applications Product Development. She is responsible for the CEO Decision Base and Present products and will plan future developments of decision-support facilities.

Before joining Data General, Barbara was employed as a software engineering manager for Wang Laboratories, an assistant professor of computer science at Rutgers University and was president of a firm which specialized in user interface designs. She holds a bachelor's degree in math from Brown University, and a master's degree in linguistics and a PhD in computer science from the University of Chicago.

Rae Warren has joined the Software Technical Services (STS) group as a planner specialist, reporting to Manager Claudia Lloyd. Rae is responsible for designing, developing and implementing the primary database in order to automate the department's record keeping and report generation activities. In addition, she provides system analysis and recommendations on current STS procedures. Rae has been with Data General since 1973, and has held various positions within Software Support.

Lou Ann Julian also has joined STS as manager of the Product Information Management group, reporting to Manager Claudia Lloyd. She is reponsible for handling software change orders, archiving the library/media room, and coordinating software status reports. In addition, she is responsible for managing the Customer Services section within STS. She has been with Data General for 10 years.

Engineering department as a hardware engineer, reporting to Dick Mangsen, section manager. Steve is responsible for providing firmware support for Data General products. He is a recent graduate of Tufts University, where he earned a bachelor's degree in electrical engineering.

In Communications Systems

Mike McDonnell has joined the Data Communications and Network Hardware Division as a diagnostic engineer, reporting to Manager Norm Schwartz. He will design diagnostic software for communications printed circuit boards. Before coming to Data General, Mike was employed at Michigan Bell as a software staff supervisor. He holds a bachelor's degree in computer engineering.

In Finance

Julie Maczko joins the Corporate Cost Accounting department as an accountant, reporting to Tom Crowe, Accounting supervisor. She is responsible for the reporting and analysis of the manufacturing cost of goods sold and variances. Julie is a recent graduate of the University of Lowell, where she earned a bachelor's degree in accounting.

In Marketing Education

Ken Miner has acccepted the position of senior Systems training specialist within the Marketing Support division, reporting to Tony Irving, manager of Product Training. In his new position, Ken is responsible for providing systems engineers and Sales representatives with training on Data General's communications hardware and software products.

Most recently, Ken was manager of Product Marketing within the Software Products and Services Division. He has been with Data General for eight years. Ken holds a bachelor's degree in physics from Susquehanna University in Pennsylvania.

Kevin Dillon has been named systems training specialist within the Marketing Support division, also reporting to Tony Irving. Kevin is responsible for training in the areas of operating systems, languages, data management products, CEO comprehensive electronic office software and configurations.

Prior to this position, Kevin was employed as a systems engineer in Data General's Rocky Hill, Connecticut, office. He has been with the company for four years. Kevin holds a bachelor's degree in computer information systems from Bryant College.

Training

Educational Services is offering the following courses in September. Prior approval of your supervisor is required for course registration. Call (tie line) 221-1647 to enroll in these or other classes. All classes will be held at the Education Center at 2400 Computer Drive in Westboro.

• *Free Training On Computer-Based Training Courses* - Educational Technologies will run alpha tests of the Introduction to ADEX and Introduction to Data General Computers Computer-Based Training (CBTs) courses on September 2, 3 and 4. If you or your staff members would like to participate in the alpha tests and receive free training, contact Lillian Cochran at 221-1548 or Cochran L:ZETA. The prerequisite for ADEX training is

Introduction to Data General Computers (skill code 99 in Field Engineering) or equivalent experience. There is no prerequisite for the other class.

˙ CEOwrite And CEO CONNECTION (OA154) - This ,.teractive, intensive workshop will acquaint employees with the features, terms and functions of the CEOwrite word processor and its CEO CONNECTION to a host system. CEO word processor experience and typewriter keyboard experience is needed to take this three-day class, which begins on Tuesday, September 8.

• ECLIPSE MV/Family Assembly Language Programming (S105/VS) - Employees will learn how to write, assemble, execute and debug programs using the Data General ECLIPSE MV/Family assembly language and utilities. The prerequisites of S209 (AOS and AOS/VS User) and assembly language programming experience are needed to attend this five-day class. The course begins on Monday, September 14.

• DG/SQL Utilization And Design (S317) - This course is designed exclusively for AOS/VS system users, and teaches working knowledge of Data General's non-procedural, SQL-based, full implementation of the relational model database management system. This system is supported under AOS/VS on the ECLIPSE MV/Family of 32-bit computers. Interested employees should have taken S209 (AOS/VS User) and have a working knowledge of database concepts. This five-day course begins on Monday, September 14.

• INFOS II Database Design And Analysis Workshop ,406) - This three-day course teaches INFOS II database design with strategies and tools for predicting and monitoring performance. The last day of class consists of a supervised database design workshop. This class beings on Tuesday, September 8.

• CEO System Manager (S221) - Some of the topics addressed in this course include CEO installations, system startup and shutdown, mail system, word processor support functions and system maintenance. Employees taking this course must have thorough knowledge of CEO from a user's perspective and S209, SH109/VS (AOS/VS Operator Training) or equivalent experience. This three-day class starts on Monday, September 14.

• ECLIPSE S/280 Field Maintenance (H180) - This course focuses on how to install and configure the system, load and run diagnostic programs and perform board-level maintenance by isolation of faults to the FRU level. The prerequisite for this five-day course is H100 (Introduction to Data General 16-bit Computer Systems). The class begins on Monday, September 14.

Pittsburgh Symphony Orchestra Entertains Audience At Great Woods

Despite less-than-ideal weather, nearly 700 Data General employees enjoyed the afternoon concert of the Pittsburgh Symphony Orchestra at Great Woods in Mansfield Sunday. The orchestra, conducted by Michael Tilson Thomas, performed selected Leonard Bernstein and George Gershwin pieces. Among the songs played were Symphonic Dances from *West Side Story, Chichester Psalms for Chorus and Orchestra,* and *Catfish Row,* from the classic *Porgy and Bess.* The Great Woods Festival Chorus performed with the orchestra, which featured a boy soprano soloist, Timothy Larson, a member of the Treble Chorus of New England.

The Great Woods concert was the third Data General summer outing of this year. The next outing is a day at York Animal Kingdom and Amusement Park in York Beach, Maine. The outing is scheduled for Saturday, August 22, with a rain date of August 23. Next week's *Mini News* will include directions to the park.

Employee Devotes Time To Music

Sunday's outing at the Great Woods Performing Arts Center had a special meaning for Data General's Larry Bassett. Instead of attending the concert as a member of the audience, Larry sang with the Great Woods Festival Chorus. He has been a member of the choral group for two years.

Singing is not new to Larry, a systems engineer within the Information Management Group (IMG). He has been singing with another group, Masterworks, for 11 years.

Masterworks makes up the nucleus of the Festival Chorus. The Festival Chorus typically performs with the Pittsburgh Symphony Orchestra several times a year. Masterworks performs four concerts of large classical choral music during its September to May season. Both groups are important to Larry.

"The Great Woods Festival Chorus attracts singers from the greater Boston area, as well as from towns around Mansfield," says Larry, who has been with Data General for 11 years. "You have to audition to get into the group. You are asked to sing a prepared solo piece for the director. Being chosen depends on your solo work, your ability to blend with the section, and the choral requirements for the coming season."

The Festival Chorus performed with the Pittsburgh Symphony Orchestra at the opening dedication of Great Woods in the first concert of the season last summer.

"Masterworks does not meet during the summer, and I began to miss the singing," Larry says. "Then Great Woods came along. Our total performance time is not as much as in the winter, but I enjoy it just as much. Michael Tilson Thomas, who conducts the orchestra, has said that the Great Woods chorus will play a larger role with the orchestra next season."

When performing, both Masterworks and the Great Woods group require one rehearsal a week, which runs about two and a half hours. As each group gets closer to the actual performance, an extra rehearsal may be scheduled in addition to the dress rehearsal with orchestra and soloists. According to Larry, however, the time is well-spent.

Get In Shape With Exercise

The Data General Fitness Club continues its exercise program with upcoming sign-up days for the next session of aerobics. Employees wishing to enroll in the classes may sign up on either of the registration days being held Wednesday, September 9 and Thursday, September 10, at 5:15 p.m. in the main cafeteria in Westboro. There are no longer any mail-in registrations.

Dancin' Aerobics and *Free Style Aerobics* are offered twice a week in the main cafeteria at 5:20 p.m. for an eight-week period. Dancin' classes will take place every Monday and Wednesday starting Monday, September 14. Free Style classes will be held every Tuesday and Thursday starting Tuesday, September 15. There will be no classes on registration days. All classes are taught by qualified exercise instructors from the Greater Worcester YMCA.

The cost is $20 per person for the eight-week program. All payments must be made payable to the Data General Activities Committee.

Anne Murray at Great Woods August 30

The Employee Activities Committee has tickets for the Anne Murray concert at Great Woods on Sunday, August 30. Tickets are $25.80 and include dessert after the show. Seats are located center stage in section 6. If you would like to attend the show, send a check payable

to Data General Activities Committee to Anne Murray at Mail Stop C-128 in Westboro. Please include a stamped, self-addressed envelope.

Tenpin League Signup Scheduled

The Data General Tenpin League begins its fall season on Wednesday, September 9, at 4:45 p.m. at the Town and Country Lanes in Shrewsbury.

All interested employees should complete the form below. You may sign up as an individual or if you have a complete team just submit one form for the entire team.

Return the forms to Patty Barry at Mail Stop E-111 in Westboro. For more information contact either Patty Barry at 228-3367 or Nancy Ricciuti at 228-6274.

1987 All-Star Softball Games Set

The Data General Softball League will hold its annual all-star event on Friday, August 21, at the Knights of Columbus field in Ashland.

This year's games feature all-star players from both leagues squaring off against each other to determine the "superior" division. In addition, a Data General executive team is being assembled to face the league officers.

Games will begin with the American League playing at 5:30 p.m., followed by the executive game at 6:45 p.m. and the National League at 8:00 p.m. After the games, a party will be held in the Knights of Columbus . Refreshments will be served, and a disc jockey will be playing music. Come join the fun and cheer on your favorite team.

Data General Softball Standings

The following are the Data General Softball League standings as of Friday, August 7:

American League

	WON	LOST	TIED	PTC

MARKETPLACE

CARPOOL
Carpool , riders needed from Brighton/Newton/Watertown to Webo, 8:30 - 5:00, we have carpool pass, Matt, x5184.

Carpool , to start from Roslindale/West Roxbury to Webo, Annie, x5754.

FREE
Cat , friendly, 3 yr old male, neutered/declawed, gold/short hair, dbl-pawed, owner allergic, 799-4571 (Auburn).

FOR RENT
Condominium , Mass/NH border, near Rt 495, 2 bdrm, laundry hook-up, $695/mo incl heat/hot water, (603) 382-4967 (Plaistow, NH).

Victorian Apartment , 4 rms, laundry/garage avail, walk to commuter train/shopping, $650/mo incl heat & hot water, 528-1336 (Franklin).

Apartment , Franklin, 1 bdrm, 2nd flr, w/laundry facilities, basketball/tennis ct, $550/mo + util, 533-6022, (Medway).

Apartment , 3 bdrm, Marlboro, $875/mo + util, 651-3927 (Natick).

Summer Rental , Dennisport, 3 bdrm, encl porch, frpl, cbl TV, near Summer St Beach, avail August 22, $550/wk, off-season $350/wk, 533-2184 (Medway).

Summer Rental , Dennisport, new contemp, 3 bdrm, 2 1/2 baths, porch/deck/balconies, frpl, cbl TV, laundry, walk to beach, avail August 22, $875/wk, off-season $550/wk, 533-2184 (Medway).

Apartment , 1st flr, 6 rm, 3 bdrm, near Rts 9 & 290, 799-6873 (Worcester).

WANTED
Roommate , female, to share 2 bdrm apt, off-street parking, $245/mo +1/2 util, 562-4719 (Hudson).

Roommate , to share 2 bdrm apt, Royal Crest Est, all amenities, cbl TV, $335/mo + 1/2 util, 460-1075 (Marlboro).

Surveyor's Transit & Tripod , 655-7062 (Natick).

Two Roommates , to share 5 bdrm house on lake, avail 9/1, 1st & last mo rent required, $325/mo, 651-3927 (Natick).

Roommate , to share 2 bdrm apt, non-smoker, dish/disp, AC, laundry, pool, near Mass Pike/T, $500/mo incl heat and hot water, 666-4864 (Brighton).

FOR SALE
Coffee Table , 6 mo old, $100, 870-0384 (Westboro).

Sony Television , 13", color, remote ctrl, $250/BO, 460-1075 (Marlboro).

Zenith Portable Television , 19", b/w, built-in carry handle, ext antenna, $25, 842-4426 (Shrewsbury).

Condominium , 2 bdrm, 1 1/2 baths, laundry, 1400 sq ft, porch, AC, 20 min to Webo, $121,000, 966-3125 (Bellingham).

Rockwood Camping Trailer , '86, model 2080, slps 6, 10K BTU heater, canopy scrn rm, $5200, 891-4836 (Waltham).

Town House , 6rms, 1 1/2 baths, waterfront, $141,900, 251-8386 (Chelmsford).

Panasonic Color Pilot TV , 19", $150; Toshiba AM/FM, stereo cass recorder, $40; 898-3669 (Westboro).

Oak Dining Room Set , w/6 chairs/hutch/china cabinet, must sell, $2500/BO, 877-1111 (Framingham).
