News For The Employees of Data General

May 13, 1988

Traffic Puts Area In A Jam

Being "stuck" in traffic until lately may have been experienced only by people traveling east toward Framingham or going to Cape Cod on a summer weekend. Yet, rush hour traffic jams on Rt. 9 and along Computer Drive/Research Drive have become just as serious over the last year. Data General along with other industrial neighbors is making an effort to do something about it.

Last month, Data General representatives met with the Westborough Board of Selectmen and Planning Board to review the problem and a variety of solutions. The meeting drew an overflow crowd of town residents and Data General employees. As a result, the town

Traffic In Westborough
Special Town Meeting

Tuesday, May 17 7:00 p.m.
Westborough High School Auditorium

Interested employees should attend.

officials have invited Data General to review the situation again at a special town meeting to be held on Tuesday, May 17 at 7:00 p.m. at the Westborough High School auditorium. The meeting was scheduled so that the traffic issue can be reviewed before a large cross-section of the town's residents. The session is open to the public. Data General employees interested in the traffic matter should be sure to attend.

During their presentation before the town officials, Brad Stroup, director of Public Affairs, and Bob Capobianco, an outside counsel representing Data General, painted a picture of traffic in this industrial area that was anything but rosey. They noted that traffic volumes along Computer Drive and Research Drive already are straining the roadways' capacity and drivers' patience. They took the Selectmen on a journey to the future and projected what this area would look like by the middle of the next decade, based on approved site plans, after the Westborough Business and Westborough Technology parks are completed.

"The purpose in going to the town was simple," says Brad. "Along with our neighbors, Data General is concerned for the safety of employees. We believe action must be taken to reduce the hazard of going to and from work. We believe it is a community problem that needs the attention of all citizens, not just employers and abutters. We are asking the Town of Westborough to take a leadership role in solving a situation we all face."

In his presentation to the the Westborough Selectmen, Brad noted that more than 5,000 vehicles now travel along Computer Drive/Research Drive during the morning and afternoon commute times. Those vehicles are driven by employees of Data General, New England Electric, GTE, Central New England College and firms in the Westborough Business and Westborough Technology parks.

Local businesses so far have not had employees suffer a serious health emergency during rush hours. "With the traffic tie-ups on these roads," says Brad, "it would be difficult to get an emergency vehicle into the area to help an employee, especially in the winter."

Today's traffic, however, will be nothing compared to what this area may look like, unless action is taken.

"Once the developments now planned are occupied by 1995, there can be twice as much office space in

this area," says Brad. "The number of vehicles during peak times will be between 11,000 and 17,000, according to the density of office space occupied. That is two to three times the traffic today."

Solutions Considered

State and local civic, governmental and planning agencies all have expressed concerns and conducted studies on ways to relieve traffic congestion along Rt. 9. But, no proposals have been made to solve the problem.

In the past, the following plans have been suggested by businesses, and local and state agencies. Each has its limitations. Some are impractical.
• Flextime - already in effect among employers.
• Car pooling - about 10 percent of employees already use it.
• Ramp widening - completed in 1983.
• Mass transit - minimal now, not a help due to the diversity of employee residences.
• Traffic signals or officer on scene - traffic signals are probably counterproductive, control officers might help.
• Traffic loop around Rt. 9 - rejected by state Department of Public Works, too expensive.
• Slip ramps to Rt. 495 - causes further traffic tie-up, federal opposition.
• Access to Rt. 30 - Data General proposal abandoned due to community opposition.

Access To Rt. 30

More than a year ago, Data General began a study on the possibility of constructing a driveway to Rt. 30, which lies north of Buildings 14A/B and runs to Westborough, Southborough and points beyond. This could relieve congestion from Data General traffic, but would require a number of approvals from residents, abutters, and several community and state agencies. The plan eventually was abandoned after strong opposition from local residents on Brady Rd. and Smith St.

"We estimate that 25 percent to 30 percent of our employees use Rt. 30 now," says Brad. "Direct access to Rt. 30 would serve to reduce the overcrowding on Rt. 9 until a longer-term solution is available."
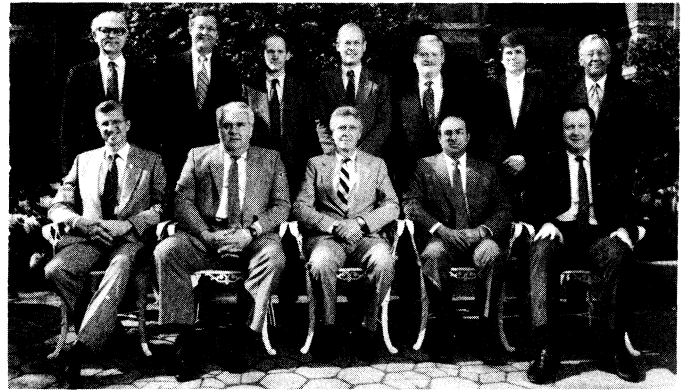

Data General would pay for the driveway cut to Rt. 30 and other expenses. Brad told the Board of Selectmen and Planning Board members that the company would be willing to donate to the town the land necessary to build a road if the town wished to pursue the project by right of eminent domain.

Such a project, Brad says, would increase Rt. 30 traffic going through Westboro (east) and Southboro, unless access to Rt. 495 was provided.

The traffic situation in this area and industry's interest in reaching a solution has sparked both interest and concern among local residents. Many oppose the company's idea for a driveway to Rt. 30. At the same time, the presentation impressed upon the town officials the severity of the traffic tie-ups in this area. Members of the Board of Selectmen agreed on the serious nature of the problem and expressed interest in working on a solution.

Data General Supports OSI

Bob Tway (front row, center), Data General's vice president for Eastern Operations, was in New York City last week to announce the company's support for the Open Systems Interconnection standard which enables products by different firms to work together. Endorsement for the standard also was voiced by executives from AT&T, Control Data, Digital Equipment, Hewlett-Packard, Honeywell Bull, IBM, Sun Microsystems, Telenet, Unisys, Wang and Xerox.

Data General joined 11 other high technology firm at a press conference in New York City last week to announce that it will make the Open Systems Interconnection (OSI) standard the way it will support multivendor networking in the future. Other firms announcing support for the OSI standard are: AT&T, Control Data, Digital Equipment, Hewlett-Packard, Honeywell, IBM, Sun Microsystems, Telenet, Unisys, Wang and Xerox.

Bob Tway, vice president of Eastern Operations, Don Tocher, director of the Data Communications and Networking Division (DCND), and Agnes Imregh, a senior manager within DCND, represented Data General at the press event which was sponsored by the Corporation for Open Systems (COS). COS was founded in 1986 to accelerate the introduction of multivendor interoperable products and services based on OSI and ISDN (Integrated Services Digital Network). Data General is a very active senior research member of COS.

Speaking on the economic impact standardization will have on business and industry worldwide, economist Murray Weidenbaum says that "the open systems movement is a heartening example of private-sector initiative." Weidenbaum heads the Center for the Study of American Business and is a member of President Ronald Reagan's Economic Policy Advisory Board. "OSI-based standards provide a platform for innovation, for opening new markets, and for increasing productivity."

Weidenbaum says that standardization creates a more competitive marketplace for computer and communications products and services, one in which users can make purchasing decisions on the basis of quality 'd performance, not on connectivity.

Employee Referral Program Makes Colorful Entry

Data General's new employee referral program offering extra large bonuses for experienced Sales, Systems Engineering and product development people is being promoted in colorful "New Wave" posters around the company.

Employees who make a referral get their own copy of the New Wave artwork which was designed specifically for Data General by Boston artist Lizi Boyd. Lizi, who started her career as a potter in Vermont, spent eight years in New York before coming to the Boston area. Her work has been displayed at the Museum of Modern Art in New York, and she is the author and illustrator of several children's books.

When a person who was referred is hired, the Data General employee receives a $1,000 bonus. For the second person hired, the bonus is up to $2,000 and for any additional referrals, the bonus is $3,000.

Making a referral is easy:

Obtain a resume or completed Data General ap-
.cation from the candidate you wish to refer.
- Submit the resume/application with an Employee referral form to your Human Resources representative. (Forms are available from Human Resources.)
3. Receipt of your referral will be confirmed.
4. If your candidate is hired, you will be notified.
5. You will receive the bonus payment within four weeks of the date of hire.

This newsletter contains the list of some open positions. Full details are available through Human Resources.

Refer experienced candidates for the following positions:

Sales Representative, Sr. Sales Representative and **Account Executive** positions are available across the country including National Account positions in Albany and San Francisco; VAR sales in Insurance in New York City; Financial and Manufacturing areas in Pittsburgh; Manufacturing in Cincinnati, Columbus and Detroit; and Government sales in New England, Philadelphia, Washington, Chicago, Los Angeles and San Francisco.

Systems Engineers in major markets including Los Angeles, Oakland, Sunnyvale, Denver, Chicago and St. Louis.

Software Communications Engineers and **Software Communication Managers** – experienced at all levels – in Data Communications and Network Development in Westboro.

Software Engineers and **Hardware Engineers** in Computer Aided Design at Westboro.

Hardware Engineers, Senior Hardware Engineers, Principal Engineers and **Project Leaders** in Processor Development, Engineering Technology, High End System Development, Industry Standard System Development, Technical Systems Development and User Systems Development at Westboro.

Sr. Hardware Engineers, Principal Hardware Engineer and **Principal Software Engineer** in Mass Storage Engineering at Durham.

Hardware Engineers in Peripheral Products Development at Durham.

Software Engineers - all levels of experience - in Software Systems Development and User Systems Development at RTP.

People

In Field Engineering

Mary Anne Been has joined the Marketing Communications group within Field Engineering as a Marketing Communications specialist, reporting to Manager Steve Carter. In this position, she will be responsible for the production of **Contact,** a quarterly magazine. In addition, she will support various Marketing events within the division.

Mary Anne worked as an associate communications writer within the Public Affairs department before joining Field Engineering. In that capacity, she produced **Mini News** and **News On Line,** and contributed to **Interface** magazine. Before coming to Data General, she was a copy editor and layout artist for MPG Communications in Plymouth. She holds a bachelor's degree in English and journalism from the University of Massachusetts at Amherst.

Raymond Daigneault has accepted the position of associate Vendor Product Support engineer within the Other Vendor Services (OSV) group, reporting to Manager Duane Tash. In this capacity, he will develop Vendor Product Support plans and strategies from a technical and business perspective. The OVS department develops support strategies for field implementation of on-call contract services on selected non-Data General equipment.

Prior to this position, Ray worked as a field engineer and support specialist. He holds an associate's degree in computer technology from Sylvania Technical School.

Mark Field has joined the Communications Systems Group within Product Technical Support as an associate product Support engineer, reporting to Manager Jim Gossett. In this capacity, he will provide technical support for a variety of Data General communications hardware and systems products.

Mark has been with Data General for 12 years. His most recent position was that of senior field engineer within Corporate Field Service, working in Westboro and Milford. He has held several Field Engineering positions in Houston and Milford. He also has worked as a test technician in Southboro's SID group. He holds a certificate from Control Data Institute.

In Corporate Marketing

Chris Christiansen has joined the Competitive Analysis group as a senior competitive analyst, reporting to Manager Stephanie Bigusiak. In this capacity, he will be responsible for analyzing product offerings from other computer firms. Before coming to Data General, Chris worked at Creative Strategies International, The Yankee Group, and Wang Laboratories. He holds a bachelor's degree in biology from Millersville State College and a master's degree in journalism from Boston University.

In SDD

Joe Gugliemino has joined the Operating Systems department as a software engineer, reporting to Section Manager Dennis Duprey. In this position, he will be responsible for supporting a software utility used to format, initialize, and maintain disk drives.

Before coming to Data General, Joe worked in the Data Processing department at The Travelers. He holds a bachelor's degree in computer science from Worcester Polytechnic Institute and a master's degree in the same subject from Rensselaer Polytechnic Institute.

In Finance

Paul Crivello has been named a supervisor of the Accounts Payable group, reporting to Paul Britton, manager of Corporate Disbursements. In this position, he is responsible for resolving vendor payment discrepancies and supporting the group in an administrative capacity.

Paul has been with Data General for ten years, working most recently as supervisor of the Shipping/Receiving department and the Copy Center. He holds an associate's degree in business administration from Becker Junior College and a bachelor's degree in management from Bentley College.

In Special Systems

John Amoruso has joined the Special Systems group as a cost accountant, reporting to Controller Jim Gribaudo. John will manage the monthly close and provide cost support to the group. John was employed at GTE Government Systems as a financial analyst for more than two years before coming to Data General. He holds a bachelor's degree in finance from Bentley College.

Kristen Calcagni also has joined Special Systems as an accounting clerk reporting to Jim Gribaudo. She will assist the group in the monthly close process and maintain the material tracking system. Kristen recently attended the Burdett School.

In NASD

Peter Nash has joined the Contract Negotiations group as a senior contract negotiator, reporting to Director Stan Driban. In this position, he will support field Sales in the areas of federal, state and local government and commercial contract negotiations.

Peter worked in similar positions at Cullinet and Addressograph Farrington before coming to Data General. He holds a law degree from Suffolk University Law School and a bachelor's degree in business administration and accounting from Providence College.

Westboro

Need To Order Nameplates?

The Purchasing department has set up a blanket purchase order with the Hartnett company for all requisitions for nameplates under $50. Nameplates are one-inch by six-inches with white lettering on a wood-grain background with magnetic backing, which are to be displayed on office walls. The cost for each $4.50. Requests for nameplates should be processed in one of the following manners:

Requisitioners who are authorized to order supplies on-line from the stockroom may order nameplates via CEO by sending a message to Jeanne Bilodea at host system SIR. Employees requesting nameplates should include name, badge number, cost center, mail stop and a list of the names to be put on the nameplates.

Requisitioners not authorized to order on-line from the stockroom (or requests for more than 11 nameplates at one time) should order nameplates on a requisition through the Purchasing department.

Nameplates should arrive approximately two weeks after receipt of the order.

Use CEO For Travel Arrangements

Employees should use CEO to make business travel arrangements with Corporate Travel Services in Westboro. Contact ADM Travel:IMG006 to obtain a fill-in-the-blank CEO travel request form.

For travel taking place within 48 hours, the Corporate Travel department will confirm employees' CEO travel requests within approximately two hours. For travel taking place beyond 48 hours, employees' travel requests will be confirmed via CEO the following morning.

Training

The following courses are offered by Educational Services for employees who want to enhance their skills with Data General systems and software.

• *DASHER D2XX, D4XX Field Maintenance (H221)* - This two-day course teaches participants how to maintain the DASHER D100, D200, D210, D211, D410 and D460 terminals to the Field Replaceable Unit (FRU) level through the proper troubleshooting techniques, diagnostics and documentation. Class begins Thursday, June 2.

• *Introduction to Data General 32-Bit Computer Systems (H100/MV)* - The evolution of Data General's computer architecture from a 16-bit to the 32-bit design used in the ECLIPSE MV series is presented in this intensive 10-day course, which begins on Monday, June 6.

• *Decision Base: Spreadsheet, Data Tables, Charting (OA200E)* - This class teaches employees how to effectively organize, analyze and display numerical data using Decision Base Spreadsheet, Decision Base Data Tables, and Decision Base Business Graphics. This three-day class begins Tuesday, May 24.

• *COBOL Programming with DG/SQL (S117)* - This course teaches employees the Data General extensions to ANSI-standard COBOL for interaction with DG/SQL database. The class teaches the programmer how to write application programs for data in a DG/SQL relational database. This five-day course begins, Monday, May 23.

• *CEO 3.0 User (Including CEOwrite) (OA302E)* - This course acquaints participants with the CEOwrite word processor (features, terms and functions) under AOS/VS. This three-day course, which is a special offering for employees, begins Wednesday, June 1.

Prior approval of your supervisor is required for course registration. Call (tie line) 221-1647 to enroll in these classes or for additional information.

Activities

Come To The Mixer Tonight

The Data General Softball League began play last week. Games are played at the Ashland Knights of Columbus field and the Cornell field. The league is planning many events this year, beginning with a mixer tonight, May 13. Employees are invited to come listen to the music, do some dancing and win some prizes. Two games are scheduled, as well. The first will begin at 5:30 p.m. and the second will take place at 6:45 p.m. The mixer will be held at the Ashland Knights of Columbus field.

Check Out Olympic, World Figure Skating Champions

Figure skating comes to the Centrum in Worcester on Sunday, June 12, at 7:30 p.m. Data General employees may purchase tickets at the discounted price of $20 each. Olympic stars include Debi Thomas, Brian Boitano, Brian Orser, Elizabeth Manley, Jill Trenary, Wilson and McCall, and Watson and Oppegard. Tickets can be purchased by sending a self-addressed, self-stamped envelope to Skating at Mail Stop C-128 in Westboro.

Today's The Day - Check New Race Routes

The Dasher races will be held today. Participants in the 11-mile bicycle time trial race are asked to gather at *5:05 p.m.* at the rear of Building 14A in the east corner of the north parking lot. You will then ride as a group to the new start on Lyons Street, where the race will start at *5:20 p.m.* The 3-mile and 10K foot races will start at the usual starting place in the back parking lot at *5:30 p.m.*

Note: At 5:20 p.m., all outgoing traffic will be diverted through the 2400 Computer Drive access road. At the start of the foot races, all vehicles will be asked to stop until all the runners have passed.

A map of the routes is included in this week's *Mini News.* Copies of the map are also posted on bulletin boards in Data General buildings.

3-mile foot race: Runners will start in the rear north parking lot and head off behind Buildings 14A and 14B, past the access road to 2400 Computer Drive, out the main driveway onto Computer Drive. At the end of Computer Drive, turn left (staying outside the traffic island and always on the right side of the road) and cross the bridge over Rt. 9. Run down the hill to the turn-around point - there will be a course marshall standing there to show you where to turn. Go back up the hill, turn right onto Computer Drive, run up Computer Drive and turn left into the main entrance. Run straight back to the rear of Building 14A, and finish where the race began.

10K foot race: Follow the 3-mile route to the turn-around and turn around. Go back up the hill to the intersection at the end of Computer Drive (up until this point the course is identical to the 3-mile course). At the intersection continue straight ahead bypassing the Jersey barrier on Lyons St. around the right end. Continue down Lyons St. and turn right on Rt. 30 at the end. Go east for 1-1/4 miles on Rt. 30, then take a sharp right onto High St. Follow High St. up over the hill and back down to Rt. 30. Turn left and follow Rt. 30 for 1/4 mile and turn left onto Brady St. Go 1/10 mile and bear right, and after another 1/10 mile turn left onto Hillcrest. Go UP the HILL and turn right on Crestview. Go 2/10 mile to the end of Crestview and turn left onto Lyons. Go past the Jersey barriers again and turn left on Computer Drive. Run the length

of Computer Drive and turn left into the 4400 main driveway. Continue straight to the finish line behind the building where you started.

11-mile bicycle race: The start will be at the intersection of Lyons Street and Rt. 30, NOT at the back of the 4400 Computer Drive parking lot. From the start the route is the same as the old road course. Go east on Rt. 30 3 miles to the traffic light at the intersection of Rt. 85. Turn right and follow Rt. 85 for 3 miles to Southville Rd. Turn right on "short cut" 100 yards before the traffic light at Southville. Go west 4 miles on Southville/Flanders Road and up the hill over Rt. 9 on the connector road. Turn right onto Computer Drive, go up the hill and turn left into the main 4400 entrance. Ride to the regular finish line at the back of the parking lot.
