

Mini News

News For The Employees of Data General

November 22, 1985

New Products Make Impressive Debut

In what was one of the most significant product announcements in the company's history, Data General has introduced a broad set of new processors, workstations, a distributed operating environment, applications and software development tools. Together these products create new standards for 32-bit system price/performance, establish a major presence in the distributed engineering systems marketplace, and triple the company's capabilities in integrated office systems.

Among the products unveiled Monday, November 18 at the famed New York City auction house, Christie's, were the 32-bit ECLIPSE MV/20000 series of computers, the ECLIPSE MV/2000 DC system, and the Distributed Systems (DS) 7000 family of engineering workstations, as well as TEO Technical Electronic Office software, an enhancement to the company's proprietary Advanced Operating System/Virtual Storage (AOS/VS) software, and AOS/Distributed Virtual Storage (AOS/DVS).

High Performance Hardware

Now at the top of the product line is the ECLIPSE MV/20000 series of machines. The computer comes in three models: the Model 1, with a starting price of \$234,000, is a single-processor system; the Model 2, priced from \$337,000, is a dual-processing system; and the Model C, available with a starting price of \$200,000, is a rack-mountable system. The systems are from two to more than three times as powerful as the ECLIPSE MV/10000 computer. All are compatible with the company's 32-bit ECLIPSE MV/Family systems.

At the other end of Data General's 32-bit computing line is the ECLIPSE MV/2000 DC. The system, small enough to fit under a desk, can work as a stand-alone system, or can support up to 24 users. It also may be tied into a network made up of larger systems. Base price for the computer is \$17,500.

For engineers, the company announced the DS/7500 and DS/7700 series of engineering

workstations. The systems are available with monochrome or color displays and can be used in either in stand-alone or multi-user environments. A DS/7500 engineering workstation with a monochrome monitor comes with a starting price of \$18,600. The starting price for the same system with a color monitor is \$29,400. The DS/7700 with a monochrome terminal is priced from \$29,000, while the engineering workstation with a color monitor is \$39,300.

Software Benefits

Technical professionals now have the TEO Technical Electronic Office software which enables them to perform engineering, documentation, planning, management and office automation tasks all on the same workstation. TEO combines CEO and DG/STAGE, the Data General/Standard Applications and Graphics Environment which offers powerful windowing techniques and electronic mail components compatible with CEO.

Users of ECLIPSE MV/family computers and the DS series will benefit from the latest enhancement of the AOS/VS operating system. The new revision, as well as the AOS/DVS operating system, supports a windowing feature which allows a terminal display screen to be divided into many different sub-areas in which separate functions can be performed at the same time. In addition, AOS/DVS software allows a family of computers to work together as one, providing users with access to resources within any computer tied into the network.

Commitment To Total Solutions

"With the products we are introducing today, we are clearly reconfirming our commitment to leadership in total solutions for the office," President Ed de Castro told trade press and analysts gathered at the introduction, "bringing the cost per user down to the lowest level yet with more performance, capability and ease of use than ever available before from any vendor. With the systems we are introducing for use in manufacturing and engineering automation we will be offering total solutions in industrial automa-

tion. These systems have user-to-workstation interface called, Technical Electronic Office or TEO, that will be for the engineering and manufacturing user, what CEO is for the office user. We expect these systems will help us achieve the same kind of market leadership in industrial automation that we have achieved in office automation. Together, these new systems will make us one of the companies capable of providing total solutions to the industry's largest markets."

During the press conference, Bob Miller, senior vice president of the Business Group, remarked, "As of today, only Data General can offer customers such a breadth of 32-bit processors - from powerful compute engines to very low cost entry level 32-bit systems - for commercial and industrial applications. These are the new ECLIPSE MV/20000 computers and the ECLIPSE MV/2000 DC.

"As of today, only Data General can offer a broad spectrum of high performance graphics workstations, anchoring the first true total computing solution for distributed engineering environments. This is the new DS/7000 Family of workstations, supported by the first distributed operating systems manufacturer, the AOS/DVS operating system," Bob continued.

"As of today only Data General breaks through the barriers separating commercial, business, industrial and personal automation. This is TEO, the Technical Electronic Office, the first complete integrated engineering and office automation software ever devised."

Analysts See Success

Industry analysts believe the ECLIPSE MV/2000 DC could have its biggest success in an emerging and potentially huge market - the departmental computer that ties together and manages the files of a roomful of personal computers.

"Departmental computer systems are becoming the heart of integrated office processing systems," says Fred Withington, a consultant with Arthur D. Little. "I expect this will be a very strong growth area."

Demand for office equipment in departments, where a group of employees is doing related work, is growing by about 30 percent a year, more than twice the rate of the computer industry as a whole. Market researcher Infocorp estimates that the four million departments and work groups in U.S. businesses and government agencies will spend \$5.3 billion next year on computer equipment. Small companies will spend another \$4.5 billion on departmental-size computers that also can run an entire business.

Analysts also believe the new engineering workstations are likely to give sharp new competition to Apollo Computer and Sun Microsystems.

Data General's new DS/7500 distributed engineering workstation combines high-performance graphics and compact, under-the-desk packaging. The DS/7500 is well-suited for architecture, engineering and construction applications.

A-Team Provides New Product Support

The Field Engineering (FE) ECLIPSE MV/20000 Announcement Team, nicknamed the "A-Team," recently was recognized by Field Engineering's Product Management department for its hardware and software support of the ECLIPSE MV/20000 computer system announcement.

The A-Team, consisting of nine Field Engineering Support employees from Milford and Westboro, has been working on MV/20000 project for more than two years to provide outstanding Field Engineering support. The team participated in development activities with Central Processor Development (CPD), Engineering, Software Development and Manufacturing to become familiar with both the hardware and software of the ECLIPSE MV/20000 processor. Members of the A-Team were on-hand Monday, November 18, at announcements in New York City and London, and will provide hardware and software support at future MV/20000 announcement locations.

Worldwide participation ensures that a nucleus of top-notch support employees are prepared to provide initial field support activities for this major new product.

As Duane Tash, Field Engineering MV/20000 Product manager of the FE Systems group points out, "Proactive involvement of Field Engineering employees during the developmental process of a new product and intensive support activities throughout the design process help to ensure a successful entry of a new product into the marketplace.

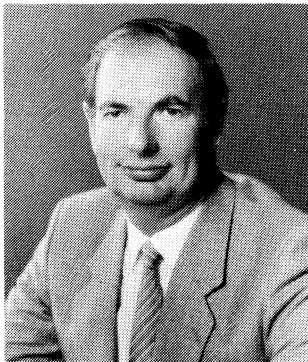

"The creation of the "Announcement Team" (A-Team) is one of many activities occurring within Field

Engineering to support the ECLIPSE MV/20000 system. Many Data General employees worked together on this product - the cooperation was tremendous."

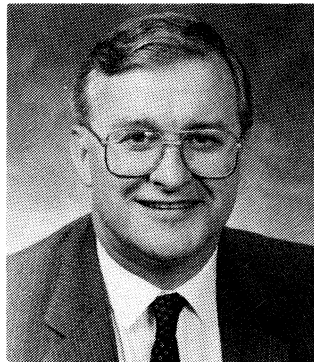

Field Engineering ECLIPSE MV/20000 Announcement Team members are: (left to right) Senior Technical Systems Engineer, Customer Service for Europe, John Videan; Senior Advisor, Corporate Technical Support Engineering for North America, John Hein; Field Engineering Corporate Product Manager Duane Tash; Senior Customer Engineering specialist for Australia Daryl Horsfall; Regional systems engineer for Australia Ian Hamilton; Area Technical Support European Supervisor/European Product Manager Om Kapila; Senior Software Support engineer for North America Don Thomas; Field Support specialist for North America Mark Iacoviello; Senior Advisor, Corporate Technical Support Engineering for North America Vic Johnson; and Software Support engineer for North America Jack Naden.

Crook And Fortune Promoted To Senior Vice Presidents

Colin Crook

Ray Fortune

Colin Crook and **Ray Fortune** have been elected senior vice presidents in recognition of their current worldwide responsibilities.

Colin, who was vice president of International Development, has been promoted to senior vice president. He is responsible for the development of international technology and business opportunities for the company. Colin reports to President Ed de Castro.

Ray, who was vice president of International Marketing and Sales, has been promoted to senior vice president. He is responsible for the company's international sales and marketing programs in countries outside North America. Ray reports to Executive Vice President Herb Richman. Reporting to Ray are Data General-Europe Vice President Chuck Boesenberg and Americas/Far East Vice President Wayne Fitzsimmons.

Prior to joining Data General in 1984 as vice president for International Development, Colin was managing director of British Telecom Enterprises where he was responsible for all non-regulated businesses, including the mobile communications business, the consumer products business and the value-added systems business. Colin also was a director on the board of British Telecom PLC. From 1979 to 1983, he was managing director of Rank Precision Industries and group managing director of Zynar, B.V., both of the Rank Organisation PLC. Prior to Rank, Colin was with Motorola, Inc. From 1972-1979, he was responsible for development of Motorola's microcomputer business as group operations director for microproducts. Colin was director of advanced systems at Motorola from 1969-1972. His responsibilities at Motorola included development of the company's 6800 and 68000 family of microprocessors.

Before becoming vice president of International Marketing and Sales, Ray was vice president for Europe since 1980, responsible for the company's European Sales and Marketing operations. Prior to 1980, he was director of European Sales for the company. Ray joined Data General in 1975 as general manager for the United Kingdom. Earlier, he held management and Sales positions with Control Data Corporation, Honeywell and Burroughs Corporation.

People

In SDD...

Ray Maese has been promoted to senior logistics support specialist in the Software Technical Services department reporting to Manager Tom Hawes. In this position, Ray is responsible for the acquisition, installation and maintenance of prototype equipment, new products and non-revenue equipment for the Systems Development Division (SDD) and the Information Systems Division (ISD) software development.

With Data General for six years, Ray previously worked as a senior field engineering supervisor at Consolidated Computer. Before that, Ray was at Raytheon Data Systems. He holds an associates degree in computer science from New Mexico State University.

IS&D Produces Software In Many Languages

The International Software and Documentation (IS&D) group produces Data General software in five different languages, including French, German, Italian, Spanish and Swedish.

Hej! Hola! Wie geht's? Bonjour! Ciao!

These are only a few of the interesting sounds you will hear if you stroll into International Software And Documentation (IS&D) at Mail Stop F131 in Westboro.

Formerly known as Translation Services, IS&D has grown in less than three years from half a dozen employees to almost 30, and has become involved in numerous "internationalization" projects, of which translation is a major part. In addition to translating the CEO Comprehensive Electronic Office system into French, German, Italian, Spanish and Swedish, IS&D produces translated user documentation (both printed and on-line) and extensively tests each foreign language version of CEO.

Headed by Manager Andrew Hawley, IS&D consists of 28 translators, language editors, production editors and project managers. There are five language groups, one for each of the "CEO languages." The department also has one Dutch translator. Qualified translators have native fluency and excellent writing skills in their "target" language, as well as a good command of English and the ability to understand and communicate technical information.

At first, only the basic CEO product was translated. Since then, the Decision Base applications (Spreadsheet and Data Table editor) have been added. Currently in progress are the Wordview and CEO Drawing Board graphics applications, and the Telex and Teletex document exchange products. In addition to the five language versions of CEO produced at Westboro, IS&D also supports CEO translation projects done outside the U.S. by Data General subsidiaries and distributors. These include Dutch, Finnish, Hebrew, Japanese, and Danish.

International Software and Documentation has produced foreign language user documentation of DESKTOP GENERATION computer systems and the

DATA GENERAL/One personal portable computer system. The department also provides, as a service to other departments, translations of correspondence, articles, technical specifications and legal materials.

Translation projects are passed on to IS&D from the International Marketing group. However, even before International Marketing determines which products the department will translate, IS&D works with Software Development to make sure new software products will be easily translatable.

When translation of a new CEO application is begun, new terminology is identified, and with the assistance of marketing staff in the various European and Latin American subsidiaries, the best foreign language equivalents are chosen. The subsidiaries also frequently review the final translated product before it is released to Manufacturing.

In the field of computers, the translator faces a special problem because computer science is a new science involving new concepts and dominated by U.S. terminology. A necessary term may not be found in any dictionary. A decision then has to be made, whether to devise a new foreign term, or possibly retain the English one. Each language must be handled separately. Translators at Data General stay in close contact with their respective countries, keeping up with changes in their language and in the rapidly changing fields of computers and office automation.

IS&D also is responsible for the initial testing of foreign software. Often, software is tested before the foreign versions are sent to Design Assurance Engineering (DAE).

International Software and Documentation is an illustration of Data General's strong commitment to the international market, a commitment which will benefit the company for years to come.

Listen For Work Cancellations

In the event of work cancellation due to severe weather conditions, the following radio stations will broadcast announcements for Data General:

WTAG (580)	- Worcester
WSSH (99.5)	- Lowell/Boston
WHDH (850)	- Boston
WBZ (1030)	- Boston
WSRO (1470)	- Marlboro
WKOX (1190)	- Framingham
WORC (1310)	- Worcester
WMRC (1490)	- Milford
WJFB/FM (97.3)	- New Bedford (Portuguese language)
WSRS/FM (96)	- Worcester
WVBF/FM (105)	- Framingham

If a decision is reached to shutdown daytime operations, the radio stations will be notified by 5:30 a.m., and the information will be broadcast immediately. Listen carefully; the station will specify which facilities are involved and what shifts are affected.

Although there often may be local school and business closings, Data General usually remains open in an effort to meet production schedules and minimize financial loss to employees.

Be Prepared For Snow And Ice

Here are a few suggestions to help prepare employees for old man winter:

1. Equip your vehicle. Snow or radial tires, ice scraper, shovel and a container of sand are best kept on or in your vehicle - not in the garage.
2. A tune-up may save you from starting problems.
3. Drive slowly. Slippery road conditions warrant added caution when entering or exiting the parking areas. Watch out for pedestrians.
4. Brush snow from tail lights, so they may be more visible.
5. At work, park carefully. Snow covered lines increase parking problems. Use common sense. Don't block your co-worker or hamper plowing operations.
6. And, don't forget - TURN OFF VEHICLE HEADLIGHTS!

Secure Your Vehicle

Data General-Westboro and its neighbors, the Southboro facility, GTE and New England Electric recently have been victimized by persons who have

stolen cars or have broken into vehicles and taken portable personal property of value. The methods used indicate they are operating along Route 9 from Worcester to Framingham. Data General Security has beefed up site security and is working closely with the police and our neighbors to prevent such occurrences.

Be sure and lock your cars at all times. If the vehicle is equipped with alarms, make certain the alarms are on. Do not leave portable personal property in sight, and above all, report all suspicious activity to Security immediately.

Westboro

Career Development Program For Corporate Manufacturing

As a result of the 1984 and 1985 Attitude and Climate Surveys, a Career Development Program has been established for Corporate Manufacturing in Westboro. The program is open to all employees of the Manufacturing division and consists of a number of different components which are outlined below:

Career Coaching Workshop

The Career Coaching Workshop is designed to provide managers and supervisors with an understanding of the career planning process. Participants will learn skills that are necessary for effective career coaching.

Career Coaching Workshops for all Westboro Manufacturing supervisors are being held Monday, November 25; Tuesday, December 3; and Thursday, December 5, from 8:30 a.m. to 5 p.m. at Central New England College. All supervisors should attend one of these sessions.

Career Coaching Workshops (one-day sessions) for Westboro Manufacturing managers will be scheduled during Quarter 2. Specific dates and locations will be announced at a later date.

Career Planning Workshop

The Career Planning Workshop is open to all Westboro Manufacturing employees. During the two-day session, participants will take a look at their skills and interests and develop personal career action plans.

Each month, beginning in December, a number of these two-day workshops will be offered to help employees focus on self-assessment, career options and action planning.

All classes will be held at Central New England College, from 8:30 a.m. to 5 p.m. The schedule is as follows:

December 11 and 12; 18 and 19.

January 16 and 17; 20 and 21; 28 and 29.

February 10 and 11; 19 and 20; 25 and 26

March 5 and 6; 13 and 14.

To register for either the Career Coaching Workshop for supervisors, or the Career Planning Workshop, use a Management and Organizational Development (M.O.D.) enrollment form, available from your manager or at M.O.D. Mail Stop A237. Upon manager or supervisor approval, forward completed form to: Debbie Gibson, Mail Stop A237. For further assistance on course selection, or M.O.D. registration, contact Frank Fisher of M.O.D. at Mail Stop A237, extension 4528 or CEO Host FISHER F:TITAN.

**Need Directory Assistance?
Dial 6054**

Employees are reminded to call Information at 6054 in Westboro for information on Westboro extensions and Mail Stops, rather than the operator.

Employees May Donate Blood

This holiday season, employees may donate blood giving "the gift of life." The Red Cross Winter Blood Drive, sponsored by Data General as a benefit to employees, will be held on Monday, December 2 and Tuesday, December 3 from 8 a.m. to 4 p.m. in a mobile unit parked outside the 14B Lobby area.

The local chapter of the Red Cross is responsible for collecting 180 to 200 units of blood on a daily basis to meet the needs of area hospitals. Your donation could make the difference between life or death.

CPR Graduates

Congratulations to the latest group of employees who recently have become certified Basic Life Support Providers. The following employees have successfully passed the American Heart Association's National Cognitive and Performance Examinations: Philip Schwartz, Susan Keller, Deborah Schreiber, Jim Bupp, Steve Columbo, Nancy Gaudette and Peter Smith.

Anyone interested in participating in future cardiopulmonary resuscitation (CPR) classes, may enroll

by contacting Nurse Helen Royal, R.N. at extension 4542 in Westboro. Classes are scheduled on a monthly basis in four, two-hour sessions.

Alarms Tested This Weekend

The monthly fire alarms and sprinkler systems testing will take place on Sunday, November 24 in Buildings 14A and 14B in Westboro. Alarm testing will begin at 8 a.m. and run until noon. Sprinklers will be checked from 9 a.m. to 1 p.m.

Activities

Holiday Party For Data General Employees

Enjoy an evening of dining and dancing at the Data General Activities Committee-sponsored holiday party, to be held at the new Westboro Plaza Hotel on Saturday, December 7 from 7 p.m. to midnight. A dinner buffet will feature roast baron of beef; broiled scrod and chicken piccata along with a variety of salads, vegetables and desserts.

Tickets are \$17 each. For tickets, send a check made payable to Data General Activities Committee and a self-addressed stamped envelope to HOLIDAY PARTY, Mail Stop D232 in Westboro. You may reserve a table of 10 by sending the request along with an order for 10 tickets.

Any attendee who wishes overnight accommodations may call the hotel directly for reservations. The corporate rate of the Westboro Plaza is \$47 per night. Reservations must be made before Monday, November 25. Employees must have a Data General badge at check in, and are responsible for their own charges.

Boston Pops To Perform In Worcester

On Sunday, December 15 at 2 p.m. Data General employees may enjoy an afternoon of traditional holiday music and familiar carols performed by the world-acclaimed Boston Pops Orchestra at the Worcester Centrum. Discount tickets are \$13 each (regular price is \$15).

To request tickets, send a check made payable to the Data General Activities Committee along with a self-addressed, stamped envelope to BOSTON POPS, Mail Stop D232.

Ice Capades At Centrum - Sold Out Show

The Data General Activities Committee has sold out its block of discount tickets to the Ice Capades show, starring 1984 Olympic star Scott Hamilton and the "Ewoks."

For those who sent in requests, tickets will be sent out upon receipt from the Centrum. Employees should receive the tickets in the mail sometime during the week of November 25.

**Toastmasters Open House
Is A Success**

The recent Anniversary Open House of Data General Toastmasters attracted more than 60 guests and members from Data General-Westboro and Southboro. Guests were treated to pizza, softdrinks and dessert while they observed a typical Toastmasters meeting.

If you missed the open house, or would like to attend a Data General Toastmasters meetings in the future, feel free to come to the regularly-scheduled meetings held each Wednesday starting at noon. For meeting location and additional information, call Loni at extension 5533 or Chris at extension 5518 in Westboro.

Stay Fit This Winter

Sign-up for the third aerobics session will be held at 5:15 p.m. on Monday, November 25 and Tuesday, November 26 in the cafeteria.

Dancing Aerobics will start on Monday, December 2, and the Free Style session starts on Tuesday, December 3 for 10 weeks. The cost is \$25. Repeat attendees need only fill out the form with mail-in registration. All new-comers MUST attend the November 25 and November 26 sign-up sessions.

**Skiers Delight -
Space Still Available For Trips**

There is still time and space available for employees to sign up for the following ski trips organized by the Data General Ski Club:

- December 14, Killington, Vermont - \$39 per person, including round-trip bus transportation and lift tickets.
- February 14 - 17, Lake Placid, New York - Double \$198, triple \$179, quad \$169; a deposit of \$50 may be sent to the Data General Ski Club at Mail Stop F211.
- February 28 - March 2, Mt. Ascutney, Vermont - Double \$130; a deposit of \$50 may be sent to the Ski Club.
- March 17 - 24, Whistler, B.C., Canada - Double \$707, Max. \$676; a \$100 deposit is due immediately to the Ski Club.

**Order Your Discount
Lift Tickets Today!**

Discount lift tickets now are available through the Data General Ski Club. Complete the ticket request form below, and return it to: DATA GENERAL SKI CLUB - TICKETS, Mail Stop F211, with ONLY check or money order made payable to the Data General Ski Club. Allow three weeks for return.
