## News For The Employees of Data General

---

May 9, 1986

### DATA GENERAL/One Becomes A Family

*The DATA GENERAL/One Model 2 comes with an electroluminescent display screen that gives users the viewing quality of a full-size display terminal and can be seen in any environment. The Model 2 also is available with a new liquid crystal display that incorporates the latest technology to provide twice the contrast of previous LCDs.*

Data General's new DATA GENERAL/One Model 2 is the computer industry's first laptop computer with an electroluminescent (EL) display compatible with the IBM PC and with an internal 10-megabyte (MB) hard disk.

The light-emitting EL screen has the viewing quality of a full-size computer display terminal and can be seen in any lighting condition. In addition, the Model 2 is available with a new liquid crystal display (LCD) that incorporates the latest technology to provide twice the contrast of previous LCDs.

"A CRT-quality display and 10-MB disk in a battery-powered system this size are technological breakthroughs that qualify the Model 2 as a second generation design," says Distribution Division Vice President Cliff Bream.

### Features

The DATA GENERAL/One Model 2 weighs under 12 pounds and is 3 by 14.3 by 11.8 inches. Its main memory is expandable up to 640 kilobytes (KB). Pricing starts at \$2795 for an EL model with 256 KB of memory and one diskette, and \$1795 for the same model with an LCD screen. The new LCD screen is available as an upgrade to existing DATA GENERAL/One systems. The DATA GENERAL/One Model 1, a two-drive system, is now priced at \$1495.

The Model 2 EL has an optional external battery pack that can power the system for up to three hours. Standard internal batteries on the LCD version provide up to seven hours of use.

Other new features available on the Model 2 include an optional floating point co-processor, a parallel printer interface for use of industry-standard printers, a screen that lies back flat to allow use of an external display, and a carrying handle.

The DATA GENERAL/One Model 2 runs the MS/DOS operating system and is compatible with the IBM PC-XT to run software designed for the IBM PC.

"With our original DATA GENERAL/One we brought to market the first truly IBM-compatible laptop," says Business Group Senior Vice President Bob Miller. "While market volume fell short of industry expectations due in part to weak computer demand, the DATA GENERAL/One has achieved approximately an 18-percent share of the laptop computer market, making Data General one of the top three suppliers in the industry. At the same time, available technology placed certain limitations on users interested in portability, especially in terms of displays. This announcement of the second generation of laptop technology eliminates those limitations once and for all."

### Applications

The DATA GENERAL/One Model 2 computer connects to Data General host systems and integrates completely into the company's CEO comprehensive electronic office software environment through CEO

CONNECTION software. CEO CONNECTION provides file transfer and document conversion between DATA GENERAL/One computers running MS/DOS software and the ECLIPSE MV/Family of computers running CEO.

Through CEO CONNECTION, the DATA GENERAL/One also can function as a terminal running CEO or other ECLIPSE MV/Family applications. This enables DATA GENERAL/One users to access CEO functions including electronic mail, electronic filing, calendar management, decision support, business graphics and word processing.

Other functions of CEO CONNECTION include menu access to CEOwrite, Data General's MS-DOS-based word processing software package, and menu access to user-specified decision support programs.

"The DATA GENERAL/One and CEO CONNECTION offer traveling executives, sales representatives and many others access to corporate data from remote locations," states Business Group Marketing Vice President Dave Lyons. "Customers with a need for portability will find that the DATA GENERAL/One Model 2 is a laptop computer with the functionality of a desktop system."

The system's expanded storage, enhanced display and the optional floating point co-processor will particularly benefit users in the petroleum, chemical and utility marketplaces, factory automation, field service and computer-aided design markets, where on-site applications are common.

"Until the introduction of the DATA GENERAL/One, industrial automation users had no practical means of computing in the field or on the factory floor," says Technical Systems Division Vice President Don McDougall. "The Model 2's enhanced display options and large disk capacity make it an attractive laptop system for industrial and technical users."

For federal users, the Model 2 offers an outstanding combination of technology and cost-

*The DATA GENERAL/One Model 2 computer is the only laptop which is fully integrated within its own office automation environment, making it a remote workstation for departmental computing applications.*

effectiveness. "The federal marketplace is seizing the opportunity to pioneer uses for laptop systems," says Federal Systems Division Vice President Larry Holswade. "The structure and services provided by federal workers lend themselves well to portable laptop systems use." Typical applications of the laptop range from inspectors within the Pentagon conducting, verifying and updating information on equipment audits at military bases to rescue/relief teams recording information on damage sustained during natural disasters.

## Getz Named Controller For Worldwide Sales Divisions

*Al Getz*

**Al Getz** has been appointed controller for the worldwide Sales divisions, responsible for directing their financial planning and control activities. He reports to the vice president/controller, a position formerly held by Jim Pitts who has resigned from the company to become executive vice president at Cullinet.

Most recently, Al was assistant corporate controller, responsible for Corporate Accounting, internal and external financial reporting, vendor and employee payments, customer invoicing, U.S. Credit operations and the external audit by Price Waterhouse. He came to Data General in 1982 as director of Accounting and Reporting. Before joining the company, Al held a variety of accounting, auditing and financial management positions with Millipore Corporation and the Gillette Company. Al also was with the public accounting firm of Arthur Andersen & Co.

A certified public accountant, Al holds a BS from Northeastern University and has completed the Program for Management Development at the Harvard Business School.

Reporting to Al are: North American Sales Division Controller Art Franson; European Operations Controller Ken Ratcliffe; Americas/Far East Controller Neil Rossen; and U.S. Credit Manager Dave Ridlon.

Accounting and Reporting Director Tom Herriford, who previously reported to AI, now will report to the vice president/controller.

## Data General To Participate In Banking Industry Trade Show

Data General will be among the exhibitors at the National Operations and Automation Conference (NOAC) trade show, Monday, May 12 through Tuesday, May 13, at the New Orleans Convention Center. The company will highlight departmental computing and banking applications in its exhibit.

To demonstrate its capability to link departmental solutions with personal computing, Data General will show a selection of third-party applications running on its 32-bit ECLIPSE MV/4000 DC minicomputers and its MS-DOS-based workstations.

Also being demonstrated is Data General's industry-leading CEO comprehensive electronic office software as it would be used in a marketing services department.

"Our participation at NOAC demonstrates Data General's commitment to offer departmental solutions for customers in the banking industry," comments Alan Law, director of Industry Marketing for the Information Systems Division. "Now and in the future, Data General will work to address the business automation needs of banking customers - through a combination of selected third-party software solutions, our compatible line of ECLIPSE MV/Family superminicomputers, and our industry-leading CEO office automation software."

## People

### In Continuing Products...

**Joanne Reich** joins DG/Direct as a senior marketing specialist, reporting to Herb Fox, manager of Telemarketing and Sales Operations. In this position, Joanne defines marketing programs and sales strategies for DG/Direct Express.

Joanne came to Data General from Wang Laboratories, where she worked as a business planning consultant. She also worked as a program manager at Honeywell Information Systems, and before that, as a systems engineer at Data General in El Segundo, Calif.

Joanne currently is pursuing an MBA at Babson College in Wellesley. She holds a BA from UCLA.

## 10-Year Employees Visit Disney World

*A contest for the most authentic '50s outfit was held as part of a Data General-weekend in Orlando, Florida. The trip was conducted in appreciation of employees' 10 years of company service.*

More than 400 employees from Data General locations across the United States last weekend visited Walt Disney World to celebrate their 10-year service anniversaries with Data General.

The group is among 850 employees and their guests who were invited to Walt Disney World's Magic Kingdom and Epcot Center in recognition of their long-term service. The weekend event featured two full days at the parks and a Saturday-evening sock hop banquet, reminiscent of the 1950s.

Since 1981, Data General has entertained nearly 900 employees at Disney World for their years of service.

## On-Line Service Now Includes 32-Bit Systems

A Field Engineering On-Line Information Service (OIS) initially offered to Data General dealers and their customers is now available for users of Data General 16- and 32-bit computers. The service provides customers in the U.S. and Canada with quick access to support and information on Data General software and hardware products and services.

Available 24-hours a day, OIS is a menu-driven service which includes more than 10 support functions such as a Software Trouble Report status directory and database, and 32-bit-product technical information. It also offers on-line support and information on 12 independent software and hardware vendors. Users can access technical data, listings of existing manuals, service contracts, updated bulletins, and down-line loading files on software products.

OIS users also may submit specific questions about their systems, which are answered by Data General product experts within two working days.

"OIS enhances productivity and system availability by providing a direct link between users and the most current information available on Data General support services and products," says Fred Cochrane, vice president of Engineering Services for Field Engineering. "Users may solve concerns without delay, saving on on-site service cost."

## Westboro

### Sign In Please

All visitors to any Data General facility must be signed in and accompanied at all times by an employee. In addition, vendors, guests and children must acquire a visitor identification badge upon entering any building. Visitors must always display their badges throughout their stay at Data General.

For those visiting after normal work hours, prior approval in written form from department managers and Security must be obtained before visitors can enter a building: weekdays after 6 p.m., weekends and holidays. The memo should include the visitor's name, purpose of the visit, location, date and time; after completion, it should be forwarded to Site Security.

Groups will be denied access to Data General premises for non-business related activities unless prior approval is obtained from Security and your department manager. Children under 18 years of age cannot enter any Manufacturing area.

### Safety, A Way Of Life At Data General

Data General works hard to provide a safe working environment for all employees and visitors, and has formed a Safety Committee to promote its goals. Through monthly safety inspections, the Safety Committee maintains high safety standards and ensures compliance with federal Occupational Safety and Health Act (OSHA) regulations throughout the entire facility.

During safety inspections, committee members inform supervisors and managers of any safety issues they may encounter. Such conditions may encompass a wide variety of issues ranging from proper aisle space, storage and housekeeping, to light outages and sprinkler system checks.

The Safety Committee also promotes safety awareness among employees by encouraging them

to take an active role in preventing mishaps. For instance, the committee makes available training aids to educate employees on proper lifting techniques, and it sponsors training on the proper use of fire extinguishers.

Safety works when employees work together to make it happen. The Safety Committee has been established for the benefit all employees. Together, everyone can help keep safety a way of life at Data General.

*Keeping Data General-Westboro a safe place at which to work are members of the Data General-Westboro Safety Committee. They are: (front row, left to right) Pauline Deignan, Helen Royal, Karen Janda, Randi Bornstein, Kathy Linton; (back row) John Geary, Chairperson Bob Shuffield, Joe Martin, Tony Gromelski. Missing from photo is Dennis Robbins.*

### Be Careful When Walking

Nice weather prompts many Westboro employees to take a few minutes for a breath of fresh air and a walk around the building during their lunch breaks.

If you are a walker, you should remember that the roads around the building are intended primarily for two-way vehicular traffic. There are no provisions for pedestrians.

Exercise caution when walking, use good sense and be courteous at all times. Walking three and four abreast creates a hazard, not only for you, but also for drivers. This is especially true when two vehicles are traveling in opposite directions.

Corporate Safety and Security suggests employees walk safely by never walking more than two abreast, and always leaving sufficient room for two vehicles to pass each other safely.

### Stop. Eyes Left, Then Go!

Employees leaving Data General-Westboro are reminded to use extra caution when turning onto Computer Drive. With the Westborough Plaza Hotel only a few yards up the street, traffic has generally increased.

When leaving Data General be sure to STOP and look to the left before proceeding. The same caution is advised when turning into Data General from Computer Drive.

## Training

### CEO Training Scheduled For May

The Manufacturing Information Resource Training Center offers several CEO comprehensive electronic office courses to employees. All courses are held at the Learning Center, located at Mail Stop C223 in Westboro. The following is a list of courses scheduled in May:

Start Date	Course Title	Duration
5/14	Trendview	4 hours
5/15	Wordview	2 hours
5/22	Spreadsheet	5 hours
5/23	Data Tables	4 hours
5/29	Present (Non-Technical)	5 hours
5/30	CEO Wordview	2 hours

To register, call extension 6202 or extension 6176 in Westboro; or send a CEO message to: ARELL D:WEBO11, or BATLEY B:WEBO11. Supervisor's approval must accompany registration. All classes begin at 9 a.m., unless otherwise noted.

### New Home And Phone Number For Educational Services

Educational Services, with the exception of Media Services, has relocated its offices to 2400 Computer Drive in Westboro, and employees can be reached through tie line 221 and their new extension.

Employees wishing to enroll in Educational Services courses at any location should now call **221-1646**. This will connect you with the Central Registration office.

### 32-Bit Language Seminar Offered

*The 32-Bit Language Environment: Concepts and Techniques for Programmers*, (SM507), is a five-day course being offered during the week of May 19 at the Education Center, 2400 Computer Drive in Westboro.

Designed for applications designers and programmers, application maintenance programmers, system engineers and senior programmers, this course recently was developed by Educational Services.

To enroll, call 221-1646 in Westboro. Prior supervisory approval is required.

### How To Reach Corporate Travel

Employees needing to make business travel arrangements can reach Corporate Travel Services in Westboro through the CEO comprehensive electronic office network address, ADM TRAVEL:ISIS, or through the tie-line network by calling 232-1000.

For those employees at locations not accessible to a tie line or the CEO network, Corporate Travel can be contacted by dialing (800) 343-5880.

#### Sales Office Relocates To Sunnyvale

The Sunnyvale Sales office has relocated from Palo Alto to the following address. Jot it down to ensure prompt delivery of mail.

**325 North Mathilda Avenue  
Sunnyvale, Calif. 94086**

**Mail Code:** 7A

**Telephone #:** (408) 773-8181

**TWX #:** K995

**CEO Host:** 10SUN1

**Note:** Data General now has two separate facilities in Sunnyvale, a Sales office and the Sunnyvale Division.

## Benefits

### Banking Reps On Location

Representatives from Union Warren Savings and Bay Banks will be available in the Marsh & McLennan office at Mail Stop C111 in Westboro to answer employee questions.

The Union Warren representative will be on the premises every other Wednesday from noon to 1 p.m. beginning Wednesday, May 7. The Bay Banks representative will be here every Friday from 10 a.m. to 3 p.m. beginning Friday, May 9.

## Medical Plan Payroll Deductions

Changes in payroll deductions resulting from the recent medical Open Enrollment will start with the Thursday, May 15-paycheck.

Employees who remained in the Data General Medical Plan (Prudential) are reminded that the cost of dependent coverage has increased to 3.3 percent of pay to a maximum of \$12.69 per week.

## Stock Plan Booklet Available

The Data General Employee Stock Plan booklet has been revised and now is available through your local Benefits department or Human Resources representative. The booklet summarizes the key features of the Employee Qualified Stock Purchase Plan, the Restricted Stock Option Plan and the Incentive Stock Option Plan, including highlights of the tax implications regarding federal income tax.

(Employees are reminded that the tax information and examples in the booklet are intended only as a guide, and they should contact their tax advisor on all tax matters.)

### Employee Investment Information

(As of April 30, 1986)

#### Savings & Investment Program

Guaranteed Fund (Current Return) 11.5%

Balanced Fund (Share Value) \$14.31

Equity Fund (Share Value) \$11.76

Loan Interest Rate 12.5%

## Activities

### Outings

**Last Call** - Riverside - May 17

**Going Fast** - Big Apple Circus - May 31

**Order Now** - High Meadows - July 5

### Last Chance To Order Riverside Tickets

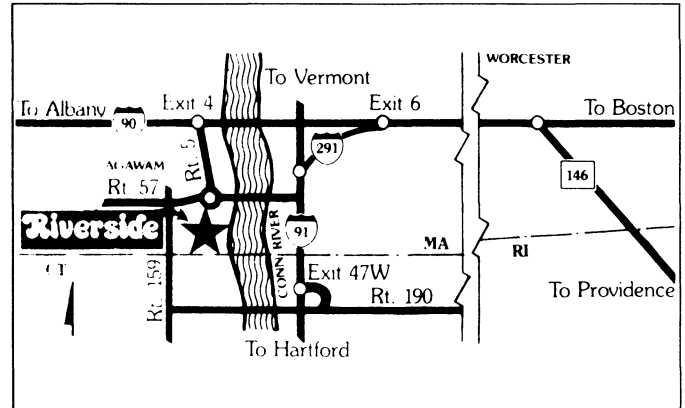

The Riverside Park outing takes place next Saturday, May 17, from 9 a.m. to 10 p.m. In between amusements and fun, employees will feast on a chicken barbeque complete with all the fixings.

This is your last chance to obtain tickets for this event, so order now. Send in an outing form indicating your preference to: OUTINGS, Mail Stop C128 in Westboro. Be sure to enclose a home-addressed,

stamped envelope with a check made payable to the Data General Activities Committee.

### Directions To Riverside

Take Exit 6 off the Mass Pike. Take I-291 west for 4.2 miles. Merge right for I-91 south. Go 2.8 miles to the "Agawam," exit, around the rotary to Route 57 west, then to route 159 south (Main Street). Continue south 2.9 miles until you see a sign for the Riverside entrance.

### Your Ticket To The Circus

Ladies and gentlemen, children of all ages - plan now to attend the The Big Apple Circus at Pier 3 in Boston (next to Anthony's Pier 4 restaurant) on Saturday, May 31 at 2 p.m. This outing includes passes to the Boston Children's Museum, which is within walking distance of the circus.

For only \$2 per person (for your first-choice outing), you and your family can enjoy circus food and fun as well as a day in Boston. Seats for the circus are no more than 35 feet from the ring.

For tickets, complete an outing form and mail with a check and home-addressed stamped envelope to: OUTINGS, Mail Stop C128 in Westboro. Tickets will be mailed out at the end of next week.

### High Meadows Orders Required Now

Sign up for the Fourth of July holiday weekend picnic at High Meadows has been lower than anticipated. **In order to carry out this event, attendance confirmation is needed by next Wednesday, May 14. Therefore, if you are planning to attend, sign up now.**

High Meadows will feature sporting activities such as softball and tennis, volleyball, badminton, bocci, basketball and many other activities for both adults and children. Hiking is available as well as an olympic-size swimming pool and wading pool for kids. The day will be capped off with a New England-style barbeque.

Complete an outing order form today. Forms are available at Activities Committee literature racks located in cafeterias.
