SUPPORT BULLETIN

SCZ-3.2 disk controller   #24
                                           1/3/92

Status: Action required if applicable
Subject: Drive support above four units under AOS/VS II rev 1.12 and above
ECO#:   1626
Assemblies: 500-492-00
Revisions: A through F
S/Ns: N/A

Problem:

> AOS/VS II revisions 1.12 and above make use of a previously unused DPJ PIO
> command when communicating with a *secondary* DPJ controller. The SCZ-3.2
> assemblies identified above do not support this command.

System Impact:

> AOS/VS II will limit the maximum number of accessible drives on these
> controllers to four.

Action Required:

> If support of more than four units under these conditions is required, a SCZ-
> 3.2 assembly 500-492-00 at revision G or above is also required.

> You may request an RMA for upgrade to current revision, if desired, by calling
> Zetaco Customer Service/Support at 800-537-5292. In-factory upgrade will be
> provided at the standard time and materials rate.
